INDEX

Author/Title Index

Abe, T.
A future technology for silicon wafer processing for ULSI, 251
ASPE News, 54, 163

Bifano, T. G., and Fawcett, S. C.
Specific grinding energy as an in-process control variable for ductile-regime grinding, 256
Blackley, W. S., and Scattergood, R. O.
Ductile-regime machining model for diamond turning of brittle materials, 95
Bucher, A.: See Knapp, W., 277

Chao, Y.H.: See Fan, K.C., 27
Citations in Precision Engineering, 64, 144, 225, 297
Cogdell, J. D.
Technical Tips: In-process workpiece temperature sensor, 135

Design News, 58
Dow, T. A.: See Fawcett, S. C., 270
Dow, T. A., Miller, M. H., and Falter, P. J.
Application of a fast tool servo for diamond turning of nonrotationally symmetric surfaces, 243

Enloe, W. S.: See Sparks, R. G., 189
Erickson, G. R.: See Schmell, R. A., 52
Evans, C.
Editorial, 3

Falter, P. J.: See Dow, T. A., 243
Fan, K. C., and Chao, Y. H.
In-process dimensional control of the workpiece during turning, 27
Fawcett, S. C.: See Bifano, T. G., 256
Fawcett, S. C., and Dow, T. A.
Development of a model for precision contour grinding of brittle materials, 270
Franse, J., Roblee, J. W., and Modemann, K.
Dynamic characteristics of the Lawrence Livermore National Laboratory Precision Engineering Research Lathe, 196

Garbini, J. L., Saunders, R. A., and Jorgensen, J. E.
In-process drilled hole inspection for aerospace applications, 125

Goto, F., Kudo, S., and Kumagai, M.
Microdrilling and plastically deformed diameters in brittle CdS crystals, 13

Hall, P. R., Book review, 62
Harriott, L. R.: See Yeh, X. L., 170
Harrison, J. C., and Talke, F. E.
Non-repeatable runout of cantilever and doubly supported $5\frac{1}{4}$" disc drive spindles, 33
Heinrichowski, M.: See Weckenmann, A., 203

Jain, V. K., and Rajurkar, K. P.
An integrated approach for tool design in ECM, 111
Jones, R. V.
ASPE distinguished contributor—1990: Address to the 1990 Annual Meeting, 5
Jorgensen, J. E.: See Garbini, J. L., 125

Kato, H.: See Nakano, Y., 177
Kawabata, N.: See Sugishita, J., 184
Keltie, R. F.: See Ozisik, H., 83
Knapp, W., Tschudi, U., and Bucher, A.
News: Comparison of different artefacts for interim coordinate-measuring machine checking: a report from the Swiss Standards Committee, 277
Kudo, S.: See Goto, F., 13
Kumagai, M.: See Goto, F., 13
Kumamoto, K.: See Sugishita, J., 184

Lingard, P. S., Purss, M. E., Sona, C. M., Thwaite, E. G., and Mariasson, G. H.
Temperature perturbation effects in a high precision CMM, 41

Mariasson, G. H.: See Lingard, P. S., 41
Martin, K. F.: See Nickols, F. M., 17
Metrology Standards News, 219, 277
Miller, M. H.: See Dow, T. A., 243
Modemann, K.: See Franse, J., 196
Mordhorst, H.-J.: See Weckenmann, A., 203

Nakano, Y., Kato, H., Tobita, T., Uetake, A., and Uno, M.
Improvement in dynamic characteristics of surface grinding machines with a horizontal spindle and a reciprocating work-table by means of a new type of dynamic damper, 177
Nickols, F. M., and Martin, K. F.
A programmable boring head with a bore diameter measuring tool tip, 17

Ozisik, H., and Keltie, R. F.
Implementation of an open-loop control technique for high-speed micropositioning in a single-point diamond turning process, 83

Paesler, M. A.: See Sparks, R. G., 189
Parks, R.
American Society for Precision Engineering: Memo from the President, 4
Product News, 55, 139, 221, 292
Purss, M. E.: See Lingard, P. S., 41

Rajurkar, K. P.: See Jain, V. K., 111
Roblee, J. W.: See Franse, J., 196

Saunders, R. A.: See Garbini, J. L., 125
Scattergood, R. O.: See Blackley, W. S., 95
Schinker, M. G.
Subsurface damage mechanisms at high-speed ductile machining of optical glasses, 208
Schmell, R. A., and Erickson, G. R.
Technical Tips: Low budget plasma assisted chemical cleaning of optical substrates at the LANL optical fabrication laboratory, 52
Schmitt, D.-R.
Characterization of high-quality surfaces by Nomarski microscopy and light scattering, 263
Sona, C. M.: See Lingard, P. S., 41
Sparks, R. G., Enloe, W. S., Paesler, M. A.
Micro-Raman depth analysis of residual stress in machined germanium, 189
Sugishita, J., Kawabata, N., and Kumamoto, K.
Grinding performance of an aluminium-bonded diamond wheel on ceramics and glass, 184

Talke, F. E.: See Harrison, J. C., 33
Technical Tips, 52, 135
Thwaite, E. G.: See Lingard, P. S., 41
Tobita, T.: See Nakano, Y., 177
Tschudi, U.: See Knapp, W., 277
